

Climate Change is happening!¹

“We are already committed to 30 years of dangerous changes in the worlds weather. Accepting this is the first...challenge.”

“We no longer have any option - only...how we choose to deal with it. Do we ignore it and hope it will go away? Or do we decide to be positive and engage with it?”

“The first step is to accept it [and] take responsibility for your emissions - to change the way you think ...[and] live.”¹

“The decisions we make now will define the world we live in now and for future generations.”²
